

# AUTORUN

Mine Sampling Systems & Consumables

West Australian company AutoRun has been providing technically innovative, quality products for sampling processes in the mining industry for over 15 years.

## AutoRun Systems

**GC AutoSampler™**

Award Winning grade control drilling offsideless automated sampling

**RC AutoSampler™**

RC drilling automated sampling

**RayTrac™**

Digitised RFID drill rig sampling with Micro-chipped sample bags

**MetTrac™**

RFID ore tracking from blast to mill

# AUTORUN

Through its original product the Australian invented and patented RayTrac Sampling Automation System, AutoRun has gone on to develop automated drill rig sampling systems such as GC AutoSampler and RC AutoSampler.

AutoRun has built a reputation for delivering sophisticated, reliable and cost effective data collection platforms in drilling, sampling, processing and assaying to blue chip ASX companies. In a commitment to innovation AutoRun has also developed complementary technical products to its main drilling product lines such as MetTrac Ore Tracking system.

## AutoRun Technical Services

We have in house mechanical, electronics, pneumatics, robotics and 3D printing capabilities.

## AutoRun RFID Sample Bag Range

We provide sample bags of different sizes imbedded with RFID microchips to work with our AutoSampling machines.
